

Material flow monitoring of coal

Client:

Steel plant (China)

Product:

Coal dust

Conveyed volumes:

10...15 kg/h

Conveyor mechanism:

Pneumatics

Installation location:

in pneumatic rising pipe

According to the client, the FlowJam-system offers the following advantages:

- Reliable yes/no notification
- Cost-effective solution

Client benefits:

- Reliable monitoring of blast furnace lances
- Quality control in the manufacturing process
