

Material flow monitoring in the cyclone

Client:

Cement plant (Spain)

Product:

Raw meal (in the cyclone)

Installation location:

with ceramic mounting in the cyclone (high temperature up to 700° C)

According to the client, the FlowJam-system offers the following advantages:

- Continuous material flow monitoring
- Simple commissioning, problem-free retrofitting
- With ceramic mounting, usable up to 700 °C

Client benefits:

- With the ceramic mounting, the measuring system is uncoupled from the heat in the cyclone and supplies a reliable yes/no notification whether material flows or not
