

# Humidity measurement of potato powder

## Client:

Animal feed producer (France)

## Product:

Potato powder

## Material humidity:

8-9 %

## Installation location:

on a slide

## What measuring process was used previously:

with a hand measuring device

## According to the client, the M-Sens system offers the following advantages over the formerly used methods:

- Continuous humidity measurement
- Independent of the material colour
- Maintenance-free

## Client benefits:

- Ensures the desired material humidity
