To Fly To Power To Live

DATA SHEET

vibro-meter®

CE281 piezoelectric accelerometer

KEY FEATURES AND BENEFITS

- From the vibro-meter[®] product line
- Sensitivity: 10 μA/g
- Frequency response: 3 to 7000 Hz
- Temperature range: -55 to 260°C (sensor) and -40 to 125°C (electronics)
- Long-distance signal transmission
- Integrally attached electronics
- Integral case insulation
- Available in standard versions and Ex versions certified for use in potentially explosive atmospheres

APPLICATIONS

 Vibration monitoring in harsh industrial environments and/or hazardous areas

DESCRIPTION

The CE281 piezoelectric accelerometer from Meggitt's vibro-meter[®] product line is a vibration sensor designed for the monitoring and protection of machinery in harsh industrial environments and/or hazardous areas.

The CE281 sensor features a centre-mounted symmetrical shear-mode measuring element using polycrystalline material. The sensor uses integrally attached electronics to provide the required signal processing, eliminating the need for an external signal conditioner (charge amplifier). The attached electronics also performs charge-to-current conversion in order to provide a current-modulated output signal that is suitable for transmission over long distances.

The sensor head is connected to the attached electronics by an integral cable (low-noise, shielded) in a hermetically sealed link, protected by a flexible, leak-tight protection tube (stainless-steel hose). More specifically, the sensor head, protection tube and electronics housing are hermetically welded to one another, resulting in a system that is fully protected against cooling fluids, lubricants, water, steam and other potential contaminants.

Each recipient of this document is responsible for ensuring that transfer or use of any information contained in this document complies with all relevant export control regulations. ECN N/A.

Enabling the Extraordinary

To Fly To Power To Live

DESCRIPTION (continued)

The CE281 sensor and electronics are insulated from their housings (integral case insulation) and have a sensitivity of $10 \, \mu A/g$. The CE281 is available in different versions for different industrial environments: standard versions for use in standard (non-hazardous) areas and Ex versions for installation in hazardous areas (see **Ordering information on page 8**).

The CE281 piezoelectric accelerometer is an extremely reliable device that is suitable for the long-term monitoring of vibration in many industrial applications.

For specific applications, contact your local Meggitt representative.

SPECIFICATIONS

General

Input power supply requirements : 15 to 28 V_{DC}, with a bias (standby) current of 5 to 8 mA

Signal transmission : Current-modulated output (2-wire system)

Signal processing

Integrally attached electronics (charge-to-current conversion)
 External
 External
 Galvanic separation unit and/or monitoring system electronics

Operating

(At 23°C ±5°C, 73°F ±9°F)

Sensitivity : $10 \,\mu\text{A/g} \pm 5\%$

Dynamic measurement range : 0.0001 to 200 g PEAK

(sensor head only)

Overload capacity (spikes) : Up to 2000 g PEAK

(sensor head only)

Linearity : ±1% over dynamic measurement range

Transverse sensitivity : <3% (measured at 15 Hz with 5 g)

Resonant frequency (mounted) : 25 kHz typ.

Frequency response : $<\pm5\%$ between 3 and 7000 Hz

Environmental

Temperature range

• Sensor head : -55 to 260°C (-67 to 500°F) continuous operation.

-70 to 290 °C (-94 to 554 °F) short-term survival (15 minutes max.).

• Attached electronics : -40 to 125°C (-40 to 257°F) continuous operation.

-55 to 150°C (−67 to 302°F) short-term survival (15 minutes max.).

Temperature sensitivity error : $\pm 5\%$ between -20 and 260 °C (-4 to 500 °F).

with respect to 23°C (73°F) -14% to +5% between -55 and 260°C (-67 to 500°F).

(sensor head only)
Shock acceleration

Sensor head
 2000 g PEAK (half-sine wave, 1 ms duration)
 Attached electronics
 500 g PEAK (half-sine wave, 1 ms duration)

Enabling the Extraordinary

To Fly To Power To Live

SPECIFICATIONS (continued)

Corrosion, humidity

Sensor head
 INCONEL[®] alloy 600, hermetically welded
 Flexible stainless-steel hose
 Stainless steel (1.4541), hermetically welded

(protection tube)

• Attached electronics : Stainless steel (1.4441), hermetically welded

Note: The sensor head, protection tube and electronics housing are hermetically welded to one another to create a leak-tight assembly that is impervious to 100% relative humidity, water, steam or oil, sea-salt atmospheres and other potential contaminants such as dust, fungus and sand.

Base strain sensitivity : $0.0025 \, \text{g/}\mu\epsilon \, \text{typ}$.

SPECIFICATIONS (continued)

Approvals

Conformity : European Union (EU) declaration of conformity (CE marking).

EAC marking, Eurasian Customs Union (EACU) certificate/

declaration of conformity.

Electromagnetic compatibility : EN 61000-6-2:2005.

EN 61000-6-4:2007 + A1:2011.

Electrical safety : EN 61010-1:2010

Environmental management : RoHS compliant (2011/65/EU)

Hazardous areas : Ex approved versions

(see Potentially explosive atmospheres on page 4)

Russian federal agency for technical regulation and metrology (Rosstandart)

: Pattern approval certificate OC.C.28.004.A N° 59463

Calibration

Dynamic calibration at factory at 120 Hz and 5 g PEAK (23°C, 73°F). No subsequent calibration necessary.

Mechanical

Dimensions : See **Mechanical drawings on page 6**

Connection

• Bayonet connector : MS3112E8-3P (stainless steel).

Mates with a CG134 bayonet connector (MS3112E08-3S).

• Threaded connector : EN2997Y10803MN (stainless steel).

Mates with a CG134 threaded connector (MIL-C-83723).

Weight

• Sensor head : 70 g (0.15 lb) approx.

• Cable/flexible stainless-steel hose

(protection tube)

: 135 g/m (0.091 lb/ft) approx.

• Attached electronics : 200 g (0.44 lb) approx.

Mounting

• Sensor head : Three M4 × 16 Allen bolts (hexagonal socket head) with

three M4 spring-lock washers.

Mounting torque of 4.5 N·m (3.3 lb-ft).

Attached electronics
 Four M6 × 35 Allen bolts (hexagonal socket head) with

four M6 spring-lock washers.

Mounting torque of 15 N·m (11.1 lb-ft).

Note:

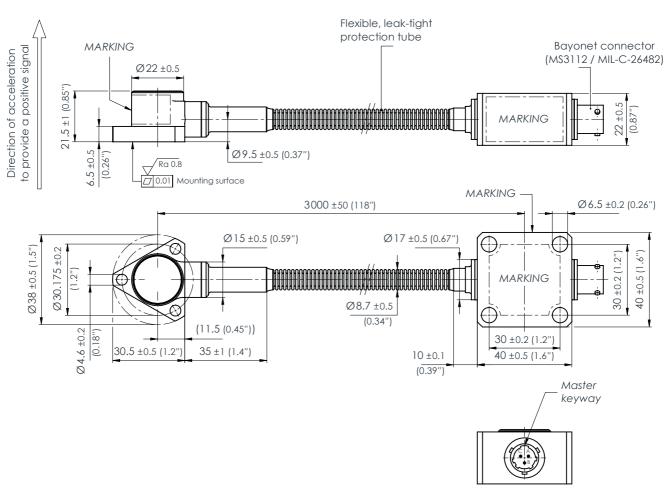

See the Mounting adaptors in **Accessories on page 8** and refer also to the Vibration measurement chains using CExxx or PVxxx sensors

installation manual.

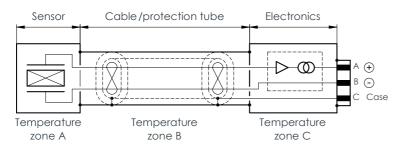

MECHANICAL DRAWINGS

CE281 with bayonet connector

Wiring diagram

Temperature zones

Zone A: -55 to 260°C (-67 to 500°F) Zone B: -55 to 260°C (-67 to 500°F) Zone C: -40 to 125°C (-40 to 257°F)

Notes

All dimensions in mm (in) unless otherwise stated.

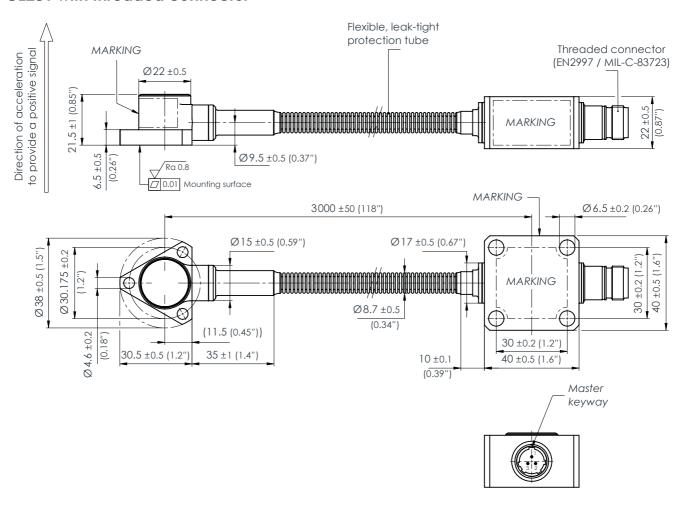

The CE281 with the bayonet connector and the CE281 with the threaded connector are identical except for the type of connector fitted to the integrally attached electronics housing.

Pins B and C of the bayonet connector must be connected together externally.

Meggitt (Meggitt PLC) is a leading international engineering company, headquartered in England, that designs and delivers high-performance components and subsystems for aerospace, defence and selected energy markets. Meggitt comprises four customer-aligned divisions:

Airframe Systems, Engine Systems, Energy & Equipment and Services & Support.

The Energy & Equipment division includes the Energy Sensing and Controls product group that specialises in sensing and monitoring solutions for a broad range of energy infrastructure, and control valves for industrial gas turbines, primarily for the Power Generation, Oil & Gas and Services markets. Energy & Equipment is headquartered in Switzerland (Meggitt SA) and incorporates the vibro-meter[®] product line, which has over 65 years of sensor and systems expertise and is trusted by original equipment manufacturers (OEMs) globally.
